

GNT

Guru Nanak Transformers

An ISO 9001 : 2015 Certified Company

Are You Looking for a Transformer Manufacturer Or Repair, Dehydration & Oil Filtration of Transformer Service Provider Then Simply Call Us Now .

Welcome to the GNT : Guru Nanak Transformers Is an ISO 9001 : 2015 Certified Company .We manufacture Transformers and servo voltage stabilizers we have been Manufacturing And repairing of Transformers over 30 Years . We built ourselves a well known company in this industry with over 30 years of its establishment and thousands of installation. our products is made up with superior quality and highly efficient and we assured our customers is our products is one of the finest in this power industry with low total cost of ownership.

Why Choose GNT :

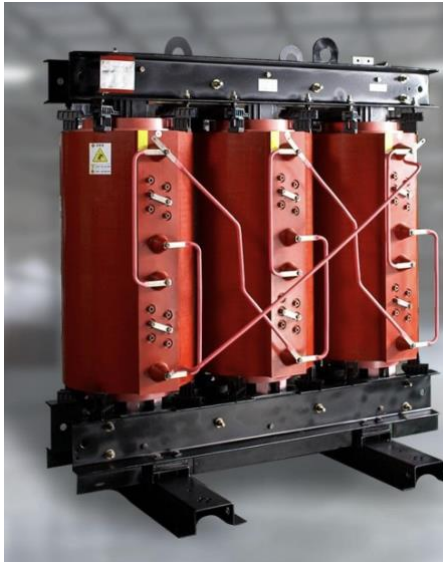

- Energy Efficient, Reliable & Superior Quality Products.
- Quick customer Support & Sufficient Service Network.
- Customization As Per Client's Need.
- Commendable Industry Experience.
- Ethical Business Policy & Believes in Positive Work Attitude.
- Over 30 Years of Experience in Power Industry.

Our Products Range :

1. **Distribution Transformer & Power Transformer :** GNT offers a complete range of distribution & power transformers designed to grant the reliability , enrrgy effecient & durability . GNT Oil colled transformers are manufactured in accordance with the most demanding industry & international standards . Transformers can be provided with off load & on load tapchanger (OLTC) Upto 5 MVA Capacity with 11/22/33KV class .

2. **Dry Type Transformer** : Dry Type transformer are no explosive fire resistant ,air insulated and colled by natural circulation of air through ducts provided in the winding . These transformers are environmental friendly as ther is no oil, hence handling becomes easier and ther is no chances of leakages and there is minimal non toxic smoke in case of fire. Rating 100 kva to 5 Mva , 11/22/33kv class with off circuit tapswitch and on load tapswitch (OLTC).

Benifiets of dry type transformers :

1. High level safety
2. Maintenance free
3. Zero risk leakage of flammable
4. High capability to withstand overload
5. Less noise pollution.

3. **Servo voltage stabilizers** : Nowadays voltage stabilizers have become mandatory for residential, office, commercial and industrial use. Voltage variation & fluctuation is commom problem in every industries. Voltage variation manifiests in many different ways due to low voltage or sags . servo voltage stabilizers increase or decrease the voltage levels and ensure that the proper range of voltage is supplied at the end . we are having Range of 10 kva to 5000 kva .

Benefits Of Servo Stabilizers :

1. They Regulate the voltage in various types of equipment .
2. Reduction of breakdown in electrical equipment upto 80%
3. Improvement in power factor can be achived as the output voltage will remain stable.
4. Energy saving upto 25%

Isolation Transformer : All types of electrical noises predominantly common mode noises can be eliminated by isolation transformer . They are used for wireless stations and costly life saving medical equipments.

Services :

1. Dehydration & filtration of transformer Oil :

Transformers play an important role in power industry.

Transformers need to be maintained to guarantee long life. Transformer oil is exposed to undesirable materials like acids, metals dust, moisture etc. When Transformer contains dust, dissolved gases and other contaminants then it's time to take action for the oil to be purified and filtered. Transformer Oil filtration is a process of removing sludge moisture from the transformer Oil.

Benefits of Transformer Oil filtration :

1. Increasing the Insulating Properties of Transformer Oil
2. With improved insulation the transformer will have longer life
3. The life of the transformer good return on investment of the asset
4. Less breakdown and failure of the transformer results in uninterrupted power supply

Why Oil Filtration is Required For Transformers ?

Almost 70% of the transformer failure happens due to contaminated Oil . Transformer Oil is liable to absorb unacceptable contaminants due to development of ageing products like Moisture, Oxidation, Formation of Gases, Dust, Metallic Parts etc. so it is very important to filter the oil regularly through transformer oil filtration machine in which our special designed high vacuum machine is used with proper procedure by our skill Engineers. We Provide on site oil filtration service Rating 100 kva to 5 Mva of Transformers.

Repairing and Remanufacturing of Transformer :

If you are facing an transformer emergency call now we will not only repair your transformer also provide an operational transformer so that you will not lose power supply. We provide immediately Transformer Faster than any one .

GNT is one the most Trusted names when it comes to Repair , Rewinding or Remanufacturing of Transformers . we have 30 years of experience in this industry we reapir, rewinding and remanufacturing of Distribution Transformer , Power Transformer, Dry Tranformer, Furnance Transformer, Servo Stabilizers Or any other special Transformer Range From 10 KVA To 10 MVA in upto CLASS 33 KV .GNT Repaired or remanufactured Transformers runs like New Transformer. Gnt also provide Warranty after repair and remanufacture of transformer .

Transformer Redesign & Remanufacture Options :

- Rewinding and Remanufacture
- Voltage Changes
- KVA Upgradation
- New Radiators
- New control & Wiring
- Transformer Assembly With OLTC

We Repair :

- Distribution Transformers
- Power Transformers
- Dry type Transformers
- Isolation Transformers
- Control Transformers
- Furnance Transformers
- Servo Voltage stabilizers

About Us : GNT Transformers Is an ISO 9001 : 2015 Certified Company .We manufacture quality Transformers and servo voltage stabilizers we have been Manufacturing And repairing of Transformers over 30 Years . We built ourselves a well known company in this industry with over 30 years of its establishment and thousands of instalation our products is made up with superior quality and highly efficient and we assured our customers is our products is one of the finest in this power industry with low total cost of ownership. We pride Ourselves on the way we do business.

Our Team : GNT is truly diverse company where talent is combined with experience to drive our business forward.

Contact Person : Gagandeep Singh (Sales Manager)

Mob : 9873594476, 9810770195, 9810883570

Office & Factory Address : 5 NH 37, Near Police station, Railway Road , Nit Faridabad (Haryana) 121001 India.
